

I am writing to support one of our local radio groups, Journal Broadcast Group in Knoxville. Their flagship station, Star 102.1, has been an invaluable supporter of our hospital (East Tennessee Children's Hospital) over the past 5 years. They have raised around \$140,000 each of the past 3 years for much needed equipment for the hospital during their Radiothon for us, equipment we would not have without their help. They sponsor several other events that raised tens of thousands of dollars for us annually and fund much needed programs and services for children in need of health care. I don't know what we would do without their support - both to get out pediatric health messages but also to fund much needed equipment and programs.
